

OZONE SAFETY CABINET SPECIFICATION

The Telchine Ozone Safety Cabinet is designed specifically for operators who may be exposed to unexpected ambient ozone in the environment which would otherwise be hazardous to their health. The safety cabinet includes both a portable ambient ozone monitor to ensure that ozone is within OSHA levels, as well as respirator masks and OV/AG respirator cartridges to ensure operator safety and compliance.

Features

- Two sets of OSHA compliant respirators and organic vapor and acid gas cartridges.
 - Silicone Masks with P100 filter rating
 - OV/AG Respirator Cartridge with P100 filter rating
- One portable ozone ambient monitor
 - Measures ozone from 0.02-0.14 PPM
 - Rechargeable battery.
- Ozone Safety Badges
 - Chemical detection badge which changes color when ozone reaches unsafe levels.
- Wall mounted clear polycarbonate cabinet with clearly visible signage.
 - Polycarbonate clear door ensures that equipment is available and stored properly for safety inspections.
